## N9137

## Quick Start Guide

### Your Phone Layout

**NOTE:**  
The appearance of your device may vary.

### Get Your Phone Ready

#### Insert the Battery

- 1 Find the notch on the back cover. Using your fingernail, lift up gently to open the back cover.
- 2 Insert the battery, contacts end first, and gently press the battery into place.
- 3 Replace the back cover, making sure all tabs are secured and there are no gaps.

#### Charge the Battery

- 1 Plug the micro-USB connector into your phone's charging/micro-USB jack.
- 2 Plug the charging head into an electrical outlet.

**NOTE:**  
You should fully charge the battery as soon as possible. Fully charging the battery may take up to three hours.

#### View Safety Information

Swipe up from the bottom of the home screen and touch **Settings** > **About phone** > **Legal information** > **Warranty**.

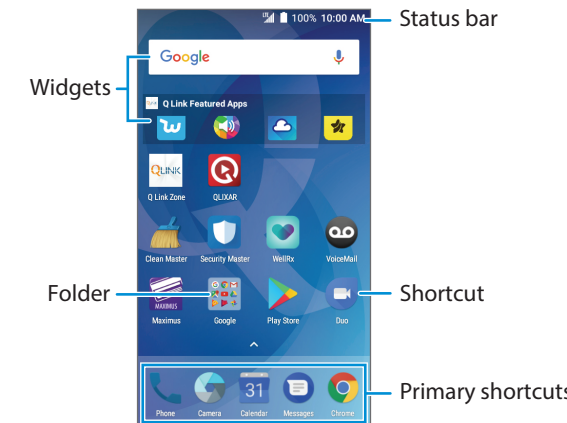

### Complete the Initial Settings

Before using your phone, press and hold the **Power** key to turn your phone on and complete the following initial settings.

- 1 On the Talkback screen, activate the Talkback feature by double-tapping the center of the screen if you have sight problems, or touch **ACCESSIBILITY** to explore other accessibility features. Touch **NEXT** if you have no accessibility problem.
- 2 On the language screen, select a language for the system and then touch **NEXT**.
- 3 Follow the on-screen instructions to complete each step or skip to the next one.
  - ▶ Select Wi-Fi network – If prompted, connect to an available Wi-Fi network to get apps or copy data. For secured Wi-Fi networks, you need to enter a password.
  - ▶ Name – Add your name to allow the phone to personalize some apps.
  - ▶ Protect your phone – Prevent others from using your phone without your permission by setting up a screen lock.
  - ▶ Google services – Turn off the Google services you do not need.

### Your Home Screen

- Touch  to return to the main home screen from any other screen.
- To view extended screens, swipe the screen left or right.
- To view notifications, drag the status bar down. Touch a notification to open it.
- If an app is on your home screen, just touch it to open it.
- If an app is not available from your home screen, swipe up from the bottom and then touch the app icon.

# Phone Basics

## Phone Calls

- 1 Touch  >  to open the Phone app.
- 2 Touch  to display the phone keypad.
- 3 Enter the number you want to call and then touch .

## Voicemail

- 1 Touch  >  > .
- 2 Touch and hold the **1** key.
- 3 Follow the voice prompts to create your password and record your name and greeting.

## Contacts

Swipe up from the bottom of the home screen and touch **Contacts**  to access and manage your contacts.

## Text Messaging

Touch  >  to access your messages.

## Settings

Swipe up from the bottom of the home screen and touch **Settings**  to configure various features and settings.

 **NOTE:**  
Icons may vary according to phone model.

# Popular Applications

## Email

- 1 Swipe up from the bottom of the home screen and touch **Email**  or **Gmail** .
- 2 Follow the prompts to enter your account information.

## Internet Browser

Swipe up from the bottom of the home screen and touch **Chrome**  or **Browser**  to access websites on the go.

## Camera

Touch  >  to take pictures and record videos.

## Find Your Phone Number

- 1 Swipe up from the bottom of the home screen and touch **Settings** .
- 2 Touch **About phone** > **Status** > **Network status**.
- 3 Scroll down to find “My phone number.”

 **NOTE:**  
Icons may vary according to phone model.

# For Your Safety

	Don't make or receive handheld calls while driving. Never text while driving.		Don't use at gas stations.
	Keep your phone at least 10 mm away from your body while making calls.		Your phone may produce a bright or flashing light.
	Small parts may cause choking.		Don't dispose of your phone in fire.
	Your phone can produce a loud sound.		To prevent possible hearing damage, do not listen at high volume levels for long periods.
	Avoid contact with anything magnetic.		Avoid extreme temperatures.
	Keep away from pacemakers and other electronic medical devices.		Avoid contact with liquids. Keep your phone dry.
	Power off when asked to in hospitals and medical facilities.		Don't take your phone apart.
	Power off when told to in aircrafts and airports.		Only use approved accessories.
	Power off when near explosive materials or liquids.		Don't reply on your phone for emergency communications.

## FCC RF Exposure Information (SAR)

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 10 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.

This device is complied with SAR for general population /uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid](http://www.fcc.gov/oet/ea/fccid) after searching on FCC ID: SRQ-N9137.

For this device, the highest reported SAR value for usage against the head is 0.62 W/kg, and for usage near the body is 1.14 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 10 mm between this device and your body.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and using such body-worn accessory should be avoided.

## FCC Regulations

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

 **CAUTION:**  
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
